Course Information

Anatomy with Lab

NR.110.204 (4.0 Credits)

Description

This course will introduce components and structures of the human body at the level of gross and microscopic anatomy. Students will learn organ localization in the body and structural features comprising the different body systems. The body systems covered will include the skin, heart, lungs, and brain, among others. Upon completion, students will have an understanding of normal healthy anatomy that will prepare them for professional health programs. This course includes a virtual laboratory component designed to complement lecture topics. For textbook information: http://nursing.jhu.edu/academics/programs/prerequisites/prerequisite-textbooks

Department: NR PP
College: School of Nursing

Course Learning Objectives

Course Learning Outcomes (CLOs):

CLO1 Define the body orientation terms, including planes of section, directional terms, body regions, pleura and pericardium and organ systems.

CLO2 Identify human body systems and major organs located in each system.

CLO3 Describe the general anatomical structures and their locations associated with each body system.

CLO4 Recognize the various layers and normal histology of the integumentary system.

CLO5 List key components of the skeletal and muscular systems.

CLO6 Describe the anatomical features of the cardiovascular and respiratory systems.

CLO7 Detail the important anatomy of the brain and head.
CLO8 identify the gross anatomical structures of the digestive, urinary, and reproductive systems.

Required Text and Other Materials

Required Textbooks and Course Materials:

*Access to McGraw-Hill Connect Plus with LearnSmart/LearnSmart Labs:* Students must purchase access code to Connect Plus in order to access the assessment items and other learning materials for this course. Please do not purchase from any 3rd party vendor before reviewing the information presented in the Canvas course site.

*Access to Anatomy & Physiology Revealed 4.0 (APR):* This program will be used mainly for the lab portion of the course. Access to APR is included in McGraw-Hill Connect Plus described above. You do not need to purchase a separate access card for this program.

*Access to a reliable computer and internet connection:* It is recommended that students using Windows-based computers should have the Windows 7 or newer operating system, and that Mac users have OS 10.6 or later. We also recommend that you use the most updated version of either Mozilla Firefox or Google Chrome as your web browser for this course. Other operating systems and web browsers may not be fully supported by the Canvas or McGraw Hill Connect. Please see the Canvas course site and for detailed system requirements.

Summary of Learning Assessments/Assignments

**Learning Assessments/Assignments**

**Graded Module Quizzes**

These are timed quizzes that are designed to test your mastery of the material covered in each module and keep you on track in your reading. The quizzes are open book and open notes. One attempt is allowed for each quiz. There are 10 graded quizzes in total in this course. You will find these quizzes under the "Assessment" section of each module.

**Lab Sessions**

Weekly lab sessions will be done mainly via Anatomy and Physiology Revealed. You are required to complete the lab procedures, submit APR assignment and post-lab quiz via Canvas for each module, from Module 1 to Module 10. An average of 60% must be achieved in the lab component of the course in order to for you to pass the course.

**Discussion Boards**
Weekly discussions can be accessed from “Discussion Board” link on the left-side menu of the course site, or from within each module. There are 5 discussion board assignments for this course. Additionally, there is an optional discussion board for lab sessions.

Exams

There are three exams consisting of multiple choice and short answer questions. They are open book, open notes and timed. Only one attempt is allowed for each exam. There are no makeup exams.

Optional Learning Activities Throughout the course, you will find Knowledge Check activities after each recorded lecture and Practice quizzes under the section in each module. In addition, SmartBook readings are also available if you prefer to read the textbook online. The Knowledge Check, Practice quizzes and SmartBook reading assignments provide self-assessment of the information presented in the lectures and the textbook and are not graded or counted towards your final course grade.

Evaluation and Grading
