Common Editing Tasks

Trimming a Video (removing the beginning and/or end of a video)

It is easy to adjust the length of a video in Kaltura. At each end of the timeline is a yellow tab that can be moved horizontally to increase or decrease the length of the video by setting the in and/or out points.
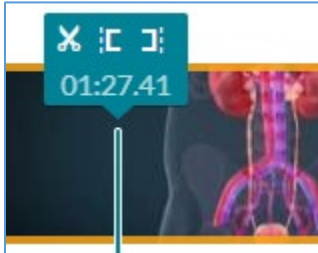

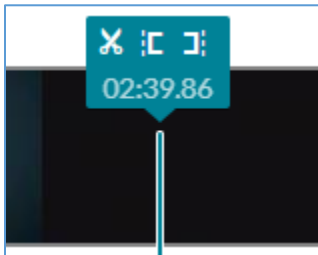

Removing an Unwanted Section of a Video

1. Position the playhead at the beginning of the content you want to delete.

2. Click the Split Tool icon to cut the video.

3. Position the playhead at the end of the content you want to delete.

4. Click the Split Tool icon to cut the video.

5. Click anywhere within the clip you wish to delete

6. Click the delete icon

7. There will be a conspicuous empty area in the timeline where the deleted content used to be. When the playhead hits this area, Kaltura will immediately jump to where content resumes.

Fade In/Out

1. Click on the content you want to add a fade in or fade out to.
2. .Click on the Fade In/Fade Out icon

3. Enter a duration for the Fade In and/or Fade Out
