

SCHOOL OF NURSING FACILITIES AND CENTERS

The School of Nursing is on the University's East Baltimore campus. In the spring of 1998, the school opened the Anne M. Pinkard Building named in honor of a local philanthropist and friend of Hopkins Nursing. The Pinkard Building was the first structure at Hopkins dedicated solely to nursing education and research.

The East Baltimore campus, 10 minutes from the Homewood campus, is a major academic health-center that includes the schools of Nursing, Medicine, and Public Health, the William H. Welch Medical Library, the Johns Hopkins Hospital, and the Kennedy Krieger Institute. The campuses are linked by a free shuttle service.

In this era of changing health care, nursing schools must educate students to assume new and different responsibilities while continuing to deliver quality patient care. To achieve the Johns Hopkins School of Nursing goals, the school completed an extensive expansion and renovation in 2021. The Anne M. Pinkard Building increased in size by 40,000 square feet and now contains flexible, dynamic, and future-oriented spaces, while also honoring the school's long history of preparing nurse leaders.

Other features of the building include:

- The Carpenter Conference Center can now accommodate larger, more interdisciplinary events with colleagues locally and globally.
- Open and spacious first floor "Hub" with areas for informal meeting, studying, teamwork, and an eatery open to the community.
- Preserved courtyard and green space in Baltimore that is highly used.
- Think Tank space for current and emerging centers and institutes to collaborate with local and international partners and develop research, clinical expertise, and technologies.
- The Martha Hill Interprofessional Research Commons, which will house JHSON's specialty centers in aging, administration, cardiovascular care, community health, global initiatives, and mental health, and give faculty and PhD students a collaborative workspace to focus on research, policy, and advocacy.

Clinical Facilities

The clinical facilities of the Johns Hopkins Hospital, as well as a variety of other acute, long-term community and specialty health care institutions in Baltimore and throughout the United States, are available for student clinical education. Nursing Practice Labs and simulation rooms ([Center for Simulation and Immersive Learning](#)) are available to provide students with an opportunity to gain experience and confidence in performing a wide variety of nursing technologies. Patient care stations in the laboratories, designed to closely approximate inpatient areas and stocked with necessary supplies,

are available for students to practice both basic and advanced nursing technologies. Practice using actual hospital equipment is an integral part of the laboratory experience, and patient simulators are provided to facilitate clinical skill mastery.
