Funding Opportunities
for Nursing Faculty and Students
THROUGH THE FOUNDATION FOR ACADEMIC NURSING

AACN invites faculty and doctoral students from member schools to apply for two funding opportunities available through the **Foundation for Academic Nursing**. These grants will support innovative projects that will lead to meaningful advancements in nursing education and practice.

The GNSA PhD-DNP Collaboration Grant

The Graduate Nursing Student Academy (GNSA) is excited to announce a new grant aimed at fostering innovative collaborations between PhD and DNP students. With a grant of $2,000, this initiative supports scholarly projects that bridge the gap between nursing research and practice. Whether it's conducting a team-based literature review, submitting a collaborative paper, or implementing a joint research initiative,

this grant is your opportunity to showcase the power of PhD-DNP teamwork. **The deadline for applications is July 19, 2024. Apply here.**

The Faculty Scholars Grant Program

To advance excellence in nursing education, AACN is looking to support two faculty projects focused on the use of simulation in nursing education. Each project, awarded $25,000, will explore the impact of simulation-based education on student transition to nursing practice. This is an incredible opportunity to contribute to the evidence base on best practices in technology-enhanced learning. **The deadline for applications is August 5, 2024. Apply here.**

Take advantage of these opportunities to advance your research and contribute to the future of academic nursing. Visit the **AACN website** for additional eligibility criteria and more information on how to submit your application.

Learn More

The Johns Hopkins Center for AIDS Research provides pilot grants to faculty in the Schools of Public Health, Medicine, and Nursing to enable and support HIV/AIDS research projects. Junior faculty in other JHU schools are eligible to apply if the proposal meets all other criteria. The primary purpose of these awards is to strengthen the individual's ability to secure independent NIH research funding with foci on R- and K-series awards.

Funds Available

The budget for faculty grants is a maximum of $50,000 in direct costs. One grant may be awarded for $75,000. Indirect costs will be calculated by the CFAR and added at the time of funding. We plan to award up to four (4) 1-year grants, with a start date of January 1, 2025.
