jumarbaratang@psu.edu.ph

Introduction/Background

CMO (CHED Memorandum Order) No. 15, series of 2017

Nursing Care Management
(14 units NCM 111)
8 units lecture
6 units RLE

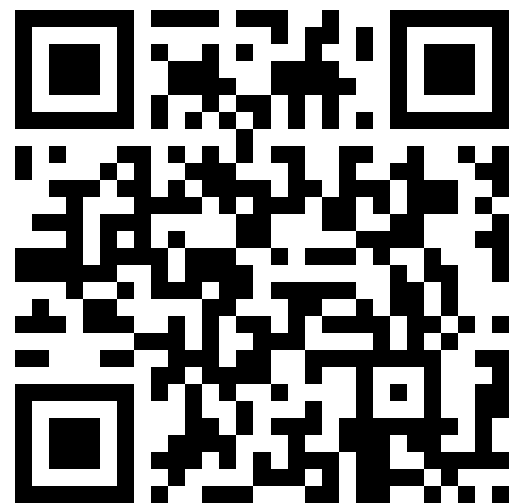

Course with highest units in BS Nursing Curriculum

Gamified learning environments not only enhance student motivation but also improve retention of information and critical thinking skills

Smith, 2018; Johnson et al., 2020

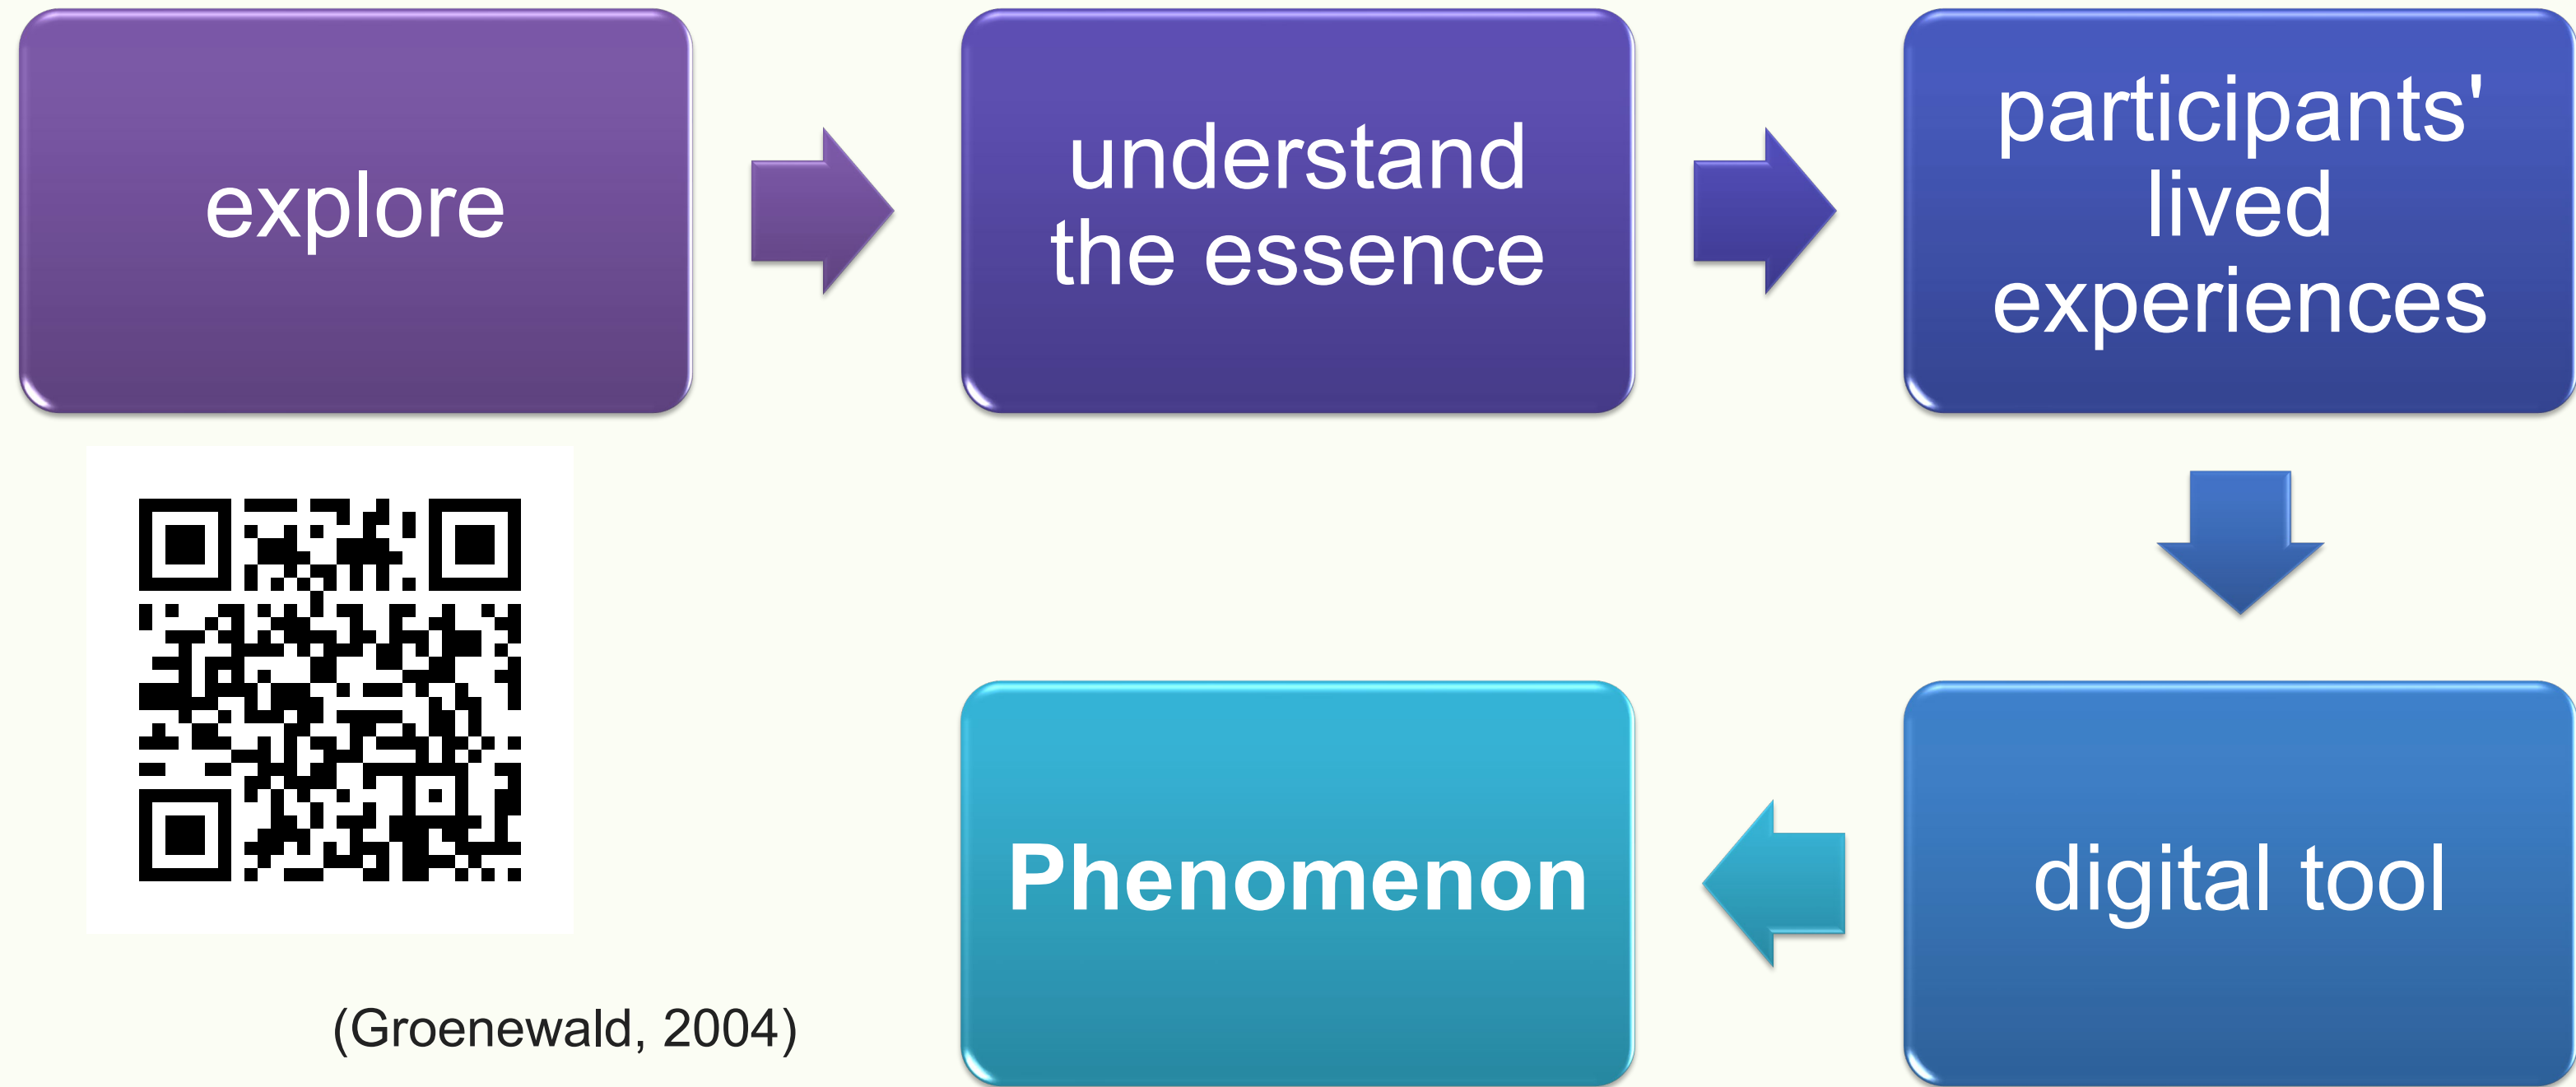

Research Question

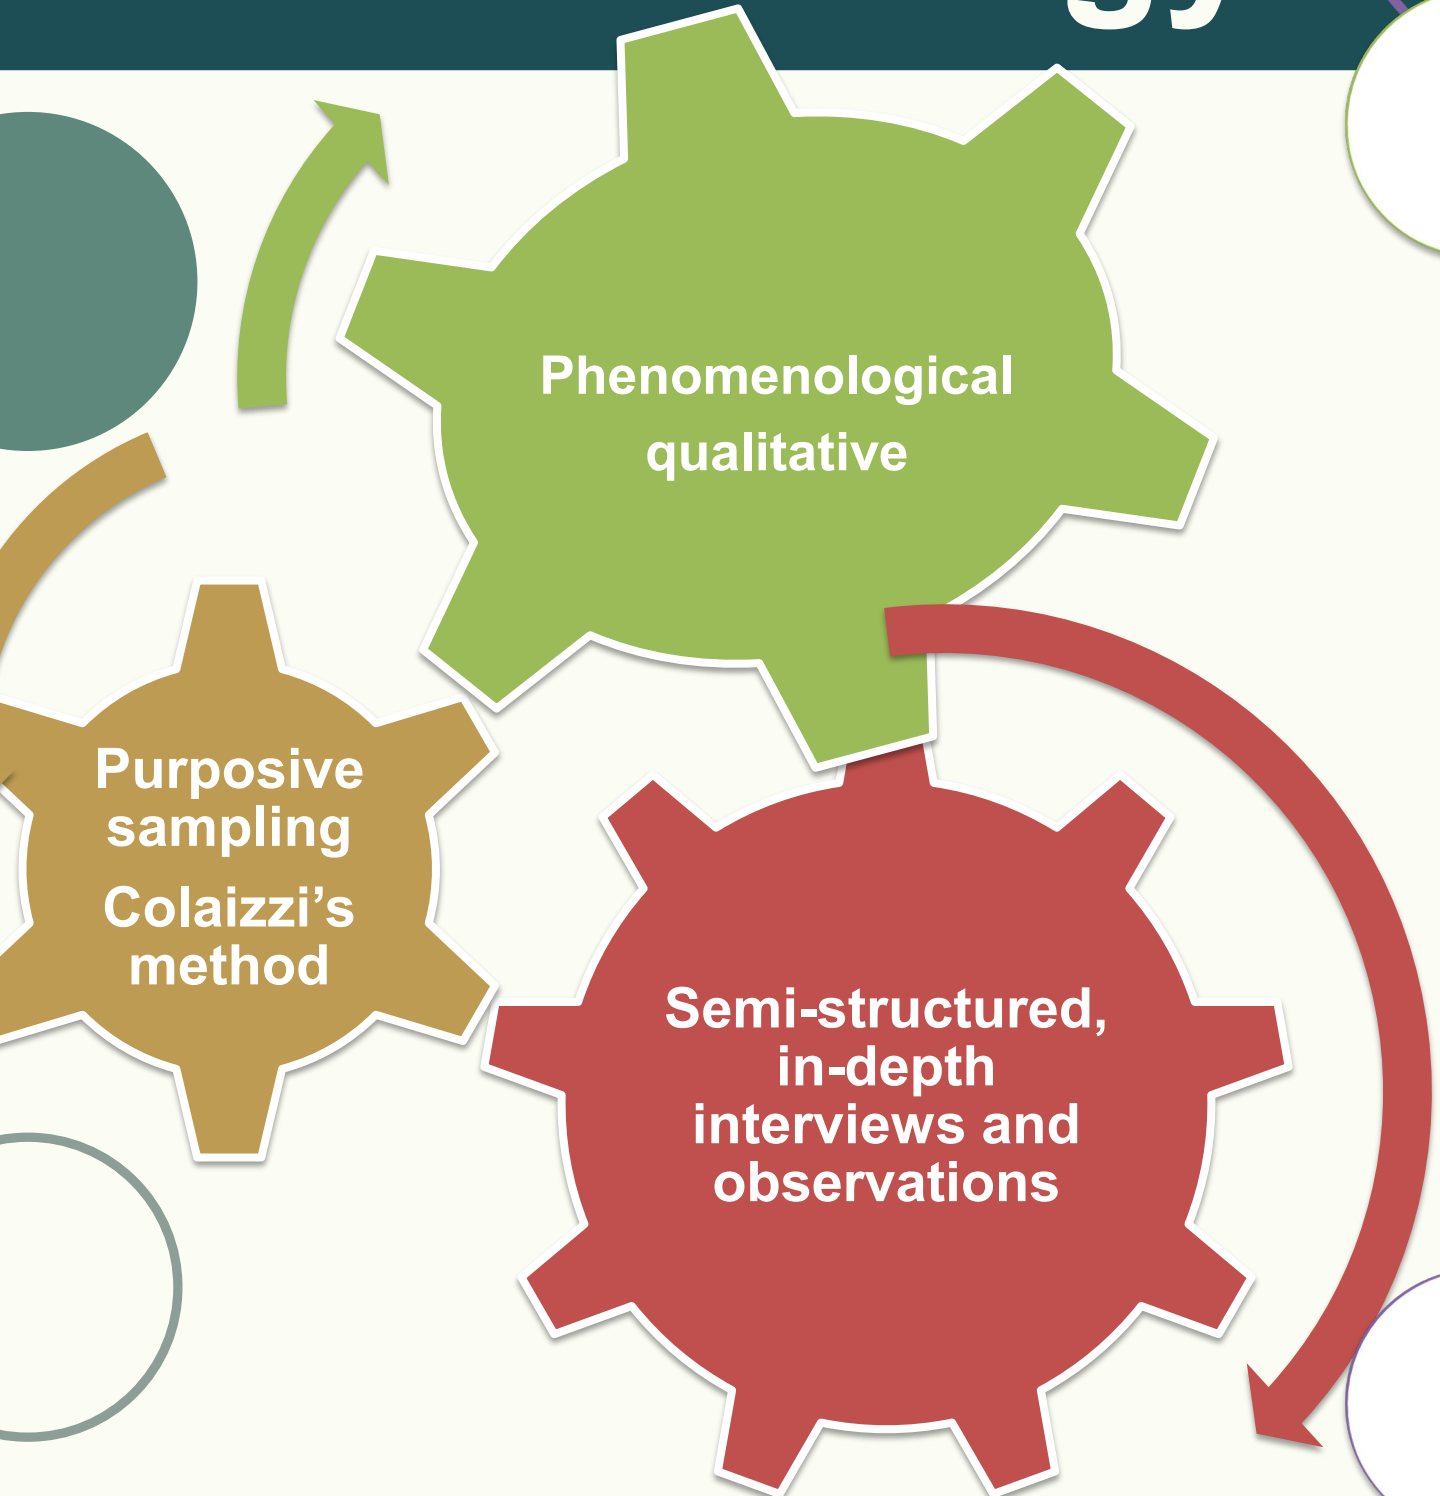

What is the Lived Experiences of Student Nurses in Utilizing QR Code Technology Medical-Surgical Nursing Class Recitation to Enhance Engagement?

Research paradigm/ study framework

Methodology

Inclusion Criteria

20 Student nurses enrolled and passed NCM 111 at Pangasinan State University

must have used the QR code technology in recitation for medical-surgical nursing topics for at least one semester.

actively engaged with QR code technology , they regularly used it for recitation related to medical-surgical nursing

18 years and older, voluntarily agree to participate and share their experiences, including providing informed consent

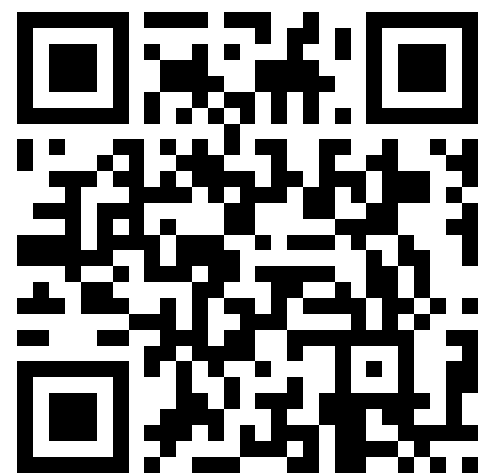

can effectively communicate and reflect on their experiences in either verbal or written formats

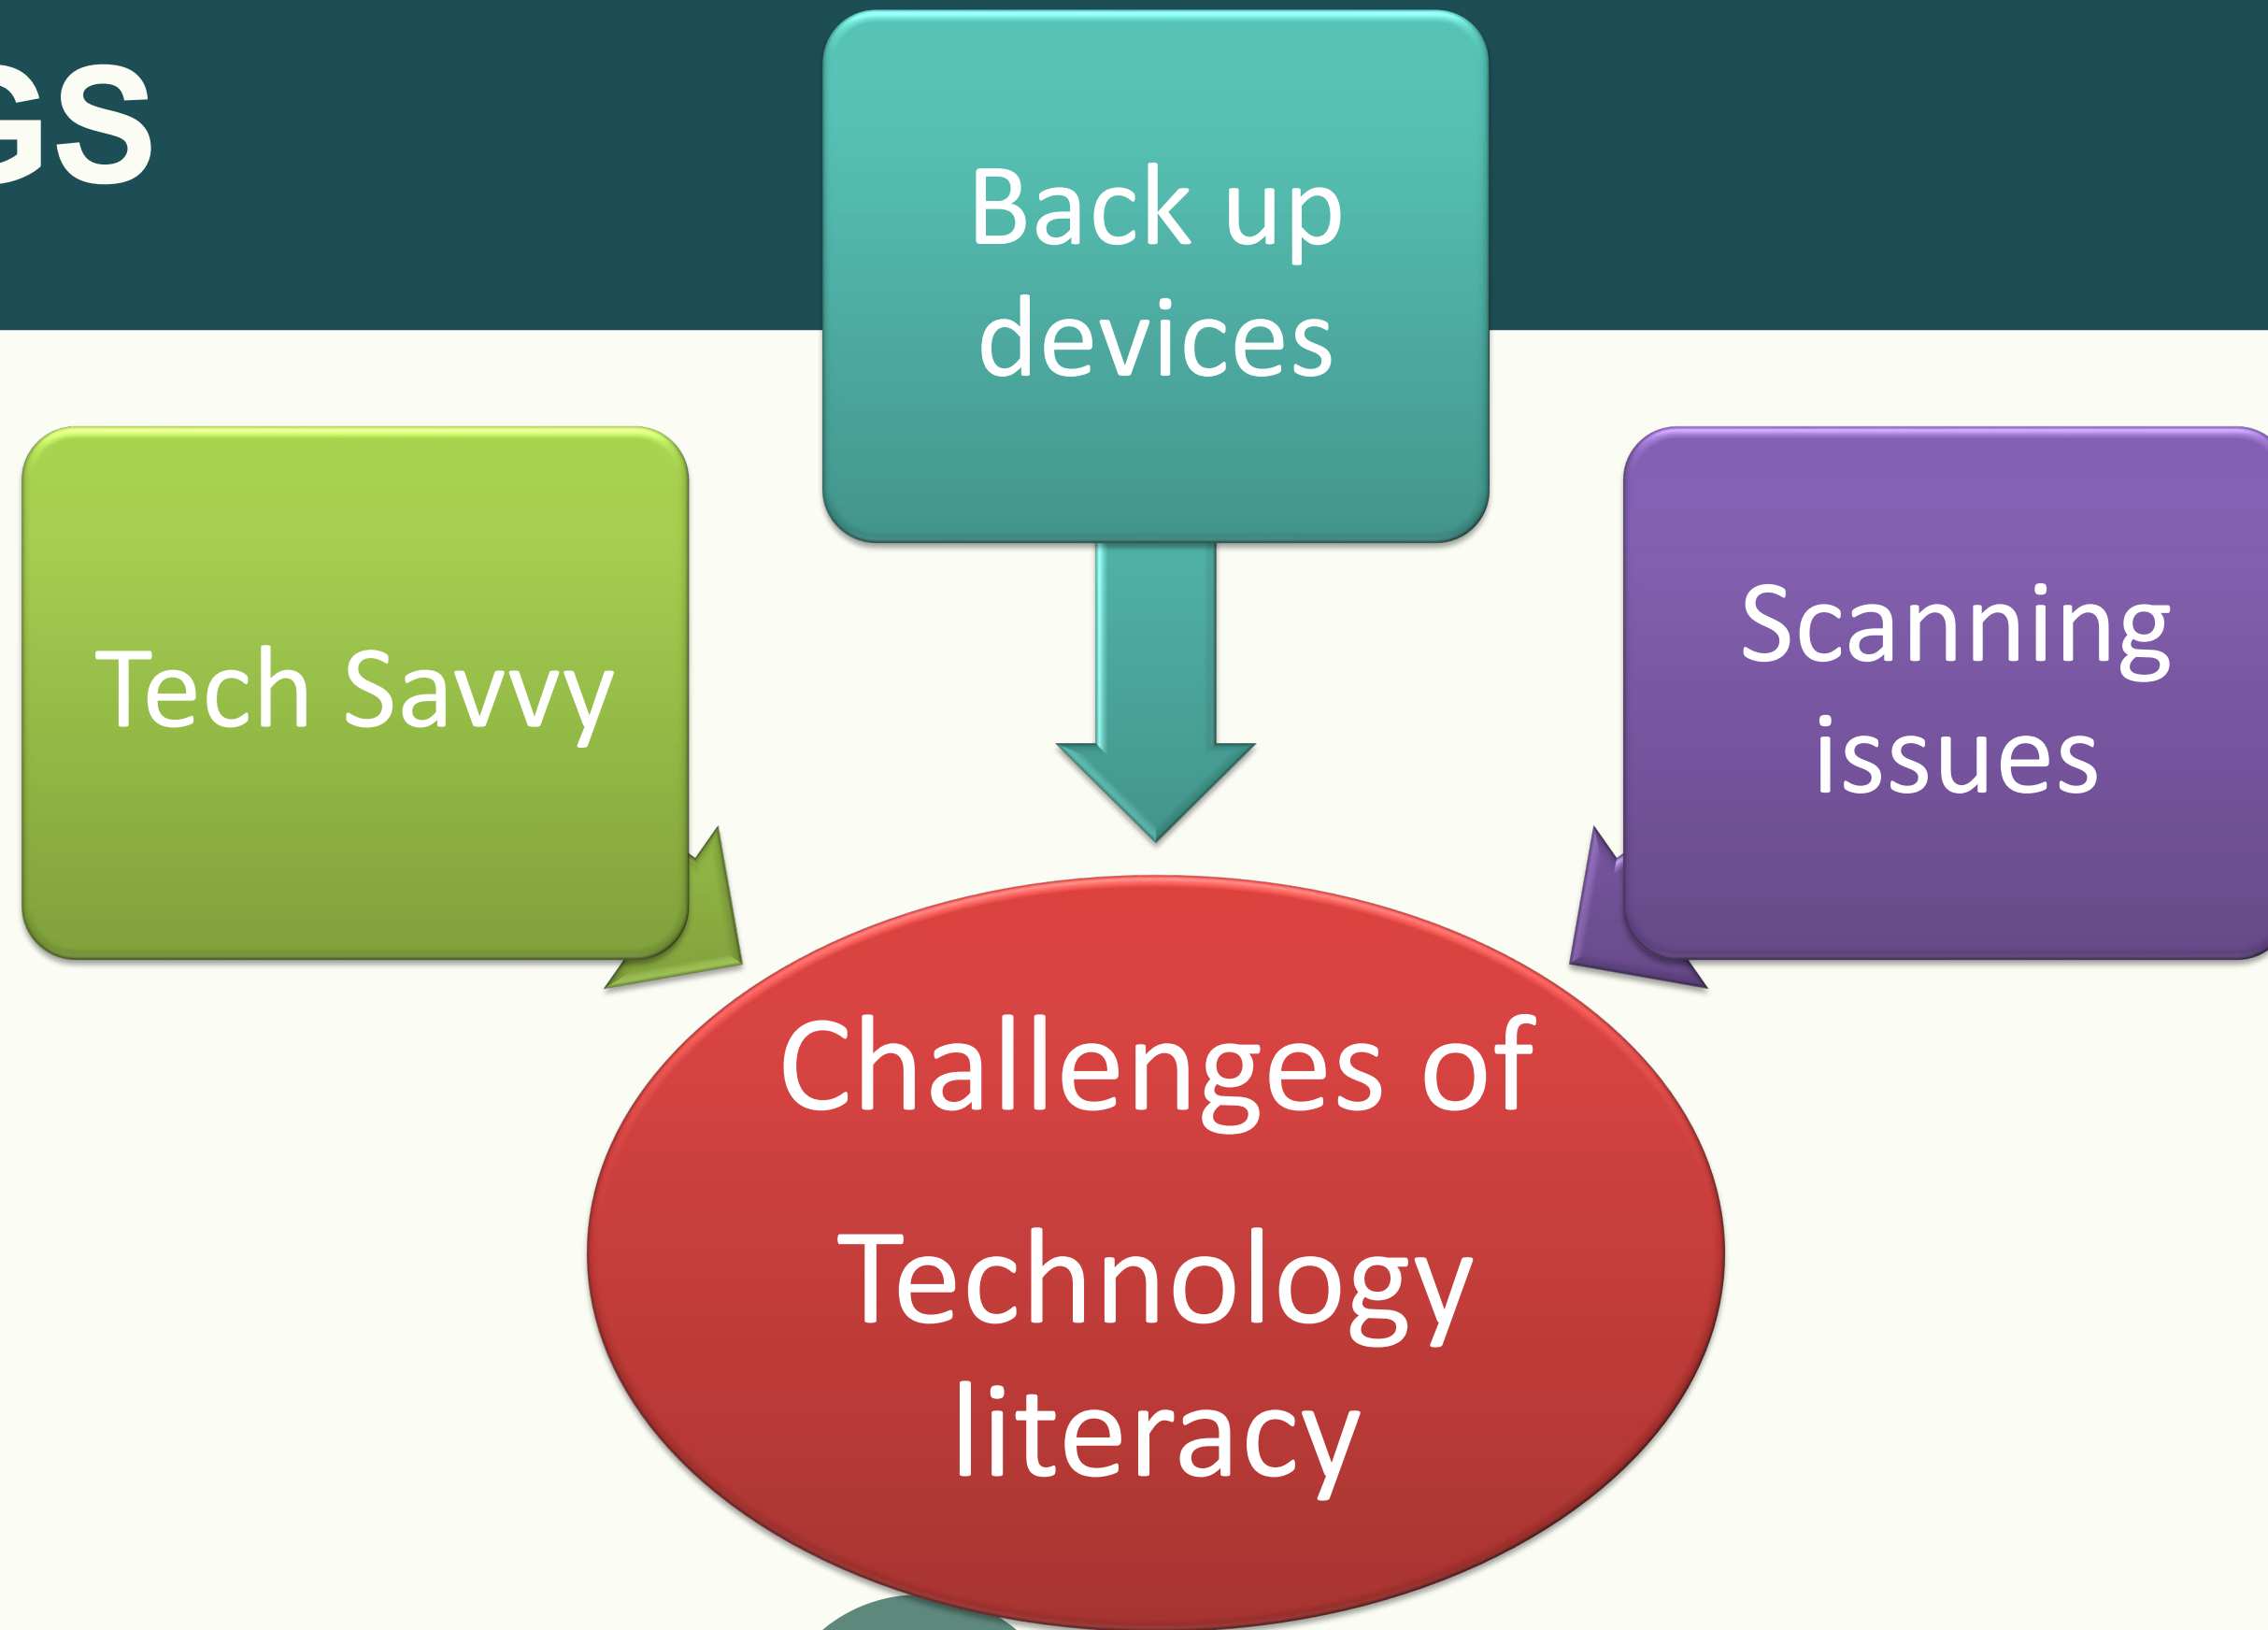

FINDINGS

FINDINGS

FINDINGS

Conclusions and recommendations

Conclusions

- Made difficult process of learning medical-surgical concepts
- fun and interactive
- engaged and focused.
- Teachers save time and became accurate in recording recitations

Conclusions

- competitive yet friendly environment
- help one another understand challenging subjects.
- Improved learning collaboration
- technological tools in nursing education.

Conclusions

- improvement in academic performance
- improved engagement
- poor digital literacy
- resiliency and flexibility
- cooperation to get recitation points

Recommendations

- **Teachers**
 - constant training with teaching innovations.
- **Students**
 - Should be oriented with teaching innovations

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all
